

HACKERONE CHALLENGE CUSTOMER TESTIMONIALS

HackerOne Challenge customers—from the U.S. Department of Defense and the U.S. Air Force, to GitHub to Airbnb—and 100's more customers are embracing the hacker-powered approach to increase the value they receive from point-in-time security tests. Here's what they had to say in their own words.

FLEXPORT

We tried pen testing before and found it very expensive and practically useless. We paid many thousands of dollars and they only found a few bugs. The first week we launched HackerOne they found several high priority bugs we fixed immediately. Huge value at the fraction of the costs.

FLEXPORT

My first thought was, 'Wow, it only took them 10 minutes to identify a vulnerability. How long would it have taken for us to discover?'

PAUL NAKASONE
LIEUTENANT GENERAL

If we had gone through the normal process of hiring an outside firm to do a security audit and vulnerability assessment, which is what we usually do, it would have cost us more than \$1 million.

ASH CARTER
SECRETARY OF DEFENSE

We saved over \$1M doing a BBP compared to doing third-party pen tests.

LISA WISWELL
HACK THE PENTAGON AND
DEFENSE DIGITAL SERVICES

We've had mixed results with traditional pen test firms in the past. With HackerOne, our Challenge was immensely successful. Beyond my expectations.

SEAN MACLSAAC
YEXT

HackerOne has been much more successful at finding problems than general penetration tests have been for us.
