

HackerOne Live Hacking Events

A Powerhouse Suite of Event Offerings to Fit Your Program's Structure

As of September 2019, HackerOne has hosted 19 events, in 11 cities, with 13 customers since the first Las Vegas live hacking event during DEF CON in 2016. Hackers have been awarded **\$6.1M** in bounties and submitted more than **4,000** reports at live hacking events. Live hacking events are expanding more rapidly than ever, offering a full suite of live hacking event package.

We will collaborate with you to identify an option that will suit your needs. From a HackerOne Flagship Live Hacking Event that delivers months of value to your security program in a power-packed few days to a community-driven Live Hacking Meetup that expands your exposure within the community, building relationships and engaging new hackers. Live Hacking Events provide a wide array of benefits, including but not limited to:

- Inject your bounty program with hackers who have the skills you need.
- Build relationships, add techniques and experience, and grow your roster of hackers.
- Expand exposure with community or other associations to elevate your brand with target groups.
- Educate your internal team and company with expert hacker input.
- Get targeted exposure to new scope, receiving focused testing on your chosen attack surface. New features, recent acquisitions, additional assets, etc. are all common targets for live hacking events.
- For In-Person Live Hacking Events, your team has the opportunity to collaborate directly with hackers, answering questions and guiding their focus resulting in more impactful findings.

More than 75% of bugs reported during a Live Hacking Event are typically valid.

Working in-person with hackers drives impressive signal-to-noise ratios!

Fast Resolution since collaboration with hackers happens in real-time at the event.

Time from report submission to validation is measured in minutes!

40% of hackers at Live Hacking Meetups are often new to the program!.

Connect with and recruit within the local hacker community!

Hundreds of testing hours, focused on targeted assets provides enhanced coverage no matter your event of choice!

Supplement your current security programs with additional focus!

Over 200 reports is typical at many Live Hacking Event packages.

Easily guide hacker focus where you need it!

Increased Hacker Involvement and Valid Vulnerability Submissions

Live Hacking Events amplify hacker focus on your current program. The h1-702 2019 participating hackers spent over 7,000 total testing hours on the events three targets! The results speak for themselves: live hacking events increase hacker engagement and drive a high volume of valid submissions.

Publicity within the Research Community

Hosting a live hacking event will give your internal security team a chance to interact personally with top hackers, building relationships, sharing techniques and experiences. An event will expand your exposure within the community to elevate your brand with target groups. See some examples below:

- **Forbes:** Put Your Company to the Test | h1-65 2019
- **Business Wire:** Hackers Earn Record \$1,902,668 During Three-Day Live Hacking Event with HackerOne, GitHub and Verizon Media | h1-702 2019

Community Events & Mentorship Programs

Community Days at LHEs bring local cybersecurity focused organizations like Cyber Patriots, Hack the Hood, Black Girls Code, WiSP, and Women's Society of Cyberjutsu together with top hackers and educators for career panels, hands on educational sessions, and 1:1 mentorship with top industry hackers. Interested in sponsoring a Community Day or Mentorship Program? Let us know!

HackerOne Live Hacking Events deliver long-term value with increased hacker interest in your brand, more elite hackers involved with your programs, and higher quality bug reports. Contact us today to discuss what options are the best fit for you!

Community Meetup Powered by HackerOne	This is a great option for any public, managed HackerOne programs that want to support and encourage engagement from the hacker community.	Want to be on the menu for community-driven meetups? Email your Program Manager today!
h1x Live Hacking Event	Great for businesses looking to build brand awareness in their local region while strengthening their security posture.	Want to host an event at your facilities? H1x Events target 10-20 of HackerOne sourced hackers local to your area, top tier banner promotions, h1x premium swag, and more!
Virtual Live Hacking Event	Ultimate flexibility. Good for teams who might not have the ability to scale quickly to support the demands of an on-site event. Allows small and medium businesses to enter the world of live hacking.	Virtual events can run anywhere from a weekend to 1-2 weeks and are a great option to get the benefits of a live event without the in-person commitments, and more!
Flagship Live Hacking Event	A fully managed in-person event including venue, catering, logistics, custom swag, and much, much more!	Geared towards enterprise customers who feel they already have a robust security structure and want a next-level experience.
Custom Live Hacking Event	Don't see an event type listed here that meets your needs? Talk to us about your goals and we can partner with you on what type of engagement plan makes the most sense for you ¹ .	In the automotive world? Want to include embedded devices in your scope? A custom live event might be the right choice for your company.

¹ Customized events (such as automotive & IoT) are available for existing clients. Talk to your account representative or email live-hacking@hackerone.com to learn more.
