

# The Pledge to Corporate Security Responsibility

We are committed to creating a safer digital world for everyone.

We promote the principles of transparency, trust and collaboration – we believe that by sharing our experiences and knowledge we can build a safer and more secure world.

This is not something that we can do in isolation. We actively encourage every organization, no matter how large or small, to take this step with us and commit to these four simple guiding principles.

## We pledge to:

1. Encourage industry-wide **transparency** to build trust and share intelligence.
2. Foster a culture of industry-wide **collaboration** that gives everyone the tools to take control of reducing cyber risk.
3. Promote **innovation** by inspiring development teams to build with security in mind and bring secure products to market faster.
4. Hold ourselves and our suppliers accountable to following best practices to develop security as an easy point of **differentiation**.
