Our pentest community is the most prestigious segment within HackerOne, valued by the testers themselves and the customers they assist. Emerging from our broader security researcher network, these experts rise to the top, chosen for their vast security testing experience, specialized technical abilities, and consistent professionalism.

Their expertise covers a broad range: from web apps, APIs, and cloud to mobile pentesting, along with a deep understanding of leading compliance frameworks and the ability to conduct thorough audits.

Diverse and Trusted Expertise

- An expansive network of pentesters spread across 27 nations.
- Proficient in diverse testing areas and technology stack.
- Vetted with meticulous background checks, ID verifications, and a mandatory requirement of 3 years of pentesting experience.
- Hand-picked by HackerOne's community team for each engagement, we guarantee the right talent fit and optimal results tailored to every customer's unique needs.

Protect Critical Assets with Expert Pentester Skills

Pentester Elligibility: Rigorous and Robust

Joining our premier pentest community demands high standards, such as a mix of:

- 3 years of professional pentesting experience with top-tier certifications.
- Stellar HackerOne metrics and a clean code of conduct.

Through Customer's Lens:

"HackerOne's pentest capability has helped us identify ways to strengthen our productis by uncovering inconsistencies we may not have been alerted to previously."

Dallan Wagner
Senior Product Security Engineer, Adobe

"Through 120 dedicated hours with 3 testers from HackerOne Pentest, we deepened our understanding of our attack surface and addressed 1 critical and 5 high-risk findings. This collaboration enabled us to secure our network and web applications more effectively."

Toan Ha
Application Security Engineer, Katalon Inc.
